30-DAY GIT LEARNING SERIES

GIT QUEST

LEVEL 1

Git vs GitHub

Week 1: First Steps | Absolute Beginner

QUEST PROGRESS: DAY 1 OF 30

Created by Rutuja Naik

The Story: Why Git Exists

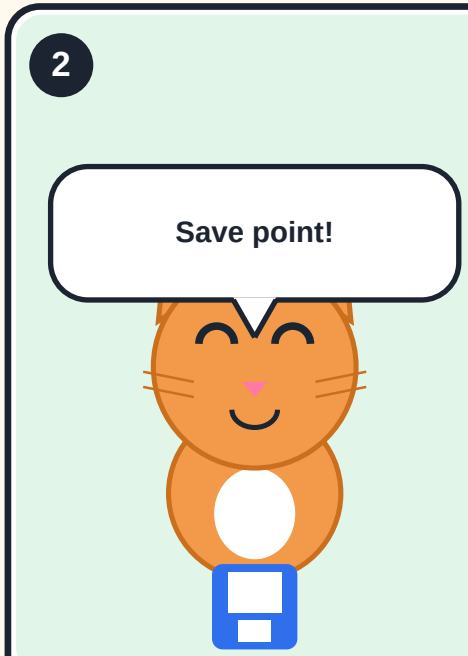
Meet Commit the Cat. Four panels, one big idea.

1

Without saves

Without saves, one mistake can erase hours of work.

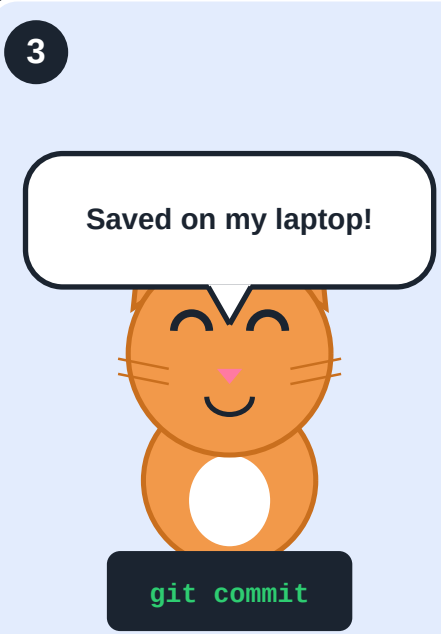
2



Save points

A commit is a save point for your files. Go back any time.

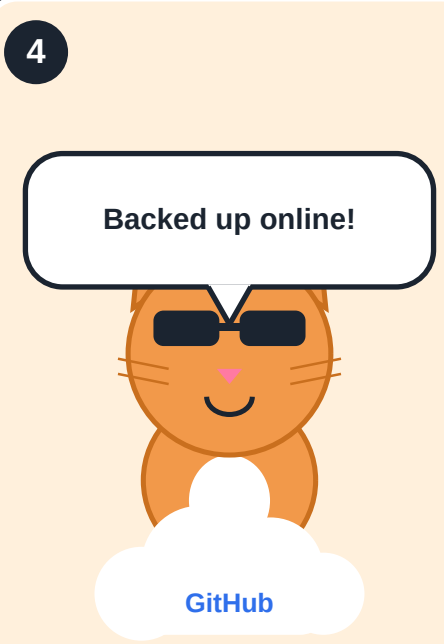
3



Git

Git is the tool on your computer that makes the saves.

4



GitHub

GitHub keeps your saves online so you can share them safely.

Choose Your Character

Git and GitHub are teammates, not the same thing.

GIT

CLASS: LOCAL HERO

LIVES ON
Your computer

NEEDS INTERNET?
No, it works offline

SUPERPOWER
Tracks every change and lets you go back in time

MADE BY
Linus Torvalds, 2005

THINK OF IT AS
The save-game system

VS

GITHUB

CLASS: CLOUD CASTLE

LIVES ON
The internet (github.com)

NEEDS INTERNET?
Yes

SUPERPOWER
Stores, shares and collaborates on Git projects

MADE BY
GitHub Inc. (owned by Microsoft)

THINK OF IT AS
Cloud storage plus a social network for saves

Remember: Git saves your work. GitHub shares it.

Quest Board: Build Your Base

Finish 4 quests, then collect 3 commits as loot.

1 Create a GitHub account

Sign up at github.com. Pick a username you would show an employer.

2 Install Git

Windows: download from git-scm.com
macOS: brew install git | Linux: sudo apt install git
Open a terminal (Git Bash on Windows) when done.

3 Check it works and introduce yourself

```
$ git --version
$ git config --global user.name "Your Name"
$ git config --global user.email "you@example.com"
```

4 Create the git-quest repository

Click + > New repository. Name it git-quest, set it to Public.
Tick Add a README file, then Create repository.

LOOT: TODAY'S 3 COMMITS

COMMIT 1

day01-intro/README.md

```
docs(day01): add intro lesson on Git vs GitHub
```

The save-game analogy and the one-liner.

COMMIT 2

README.md (edit)

```
feat(day01): add animated header to README
```

Typing animation from the next page.

COMMIT 3

day01-intro/exercise.md

```
chore(day01): add exercise and progress tracker
```

The challenge plus a progress table.

Use Add file > Create new file in GitHub's web editor. Each save you commit is a real commit. Terminal commits begin on Day 2.

Boss Fight and Bonus Loot

Copy, paste, answer, and unlock Level 2.

BONUS 1: ANIMATED TYPING HEADER

```
![Typing](https://readme-typing-svg.demolab.com?lines=Welcome+to+Git+Quest&center=true&width=500)
```

Paste at the top of README.md. Change the text after lines= (use + for spaces).

BONUS 2: DIAGRAM GITHUB DRAWS FOR YOU

````
```mermaid
flowchart LR
  A[Your computer: Git] -- git push --> B[GitHub: cloud]
```
````

BONUS 3: PROGRESS TRACKER

```
## Progress
| Day | Topic             | Status      |
|-----|-------------------|-------------|
| 1   | Git vs GitHub     | Done        |
| 2   | git init + commit | Coming soon |
```

BOSS FIGHT: QUICK QUIZ

1. Which one works without internet, Git or GitHub?
2. What do we call a single save in Git?
3. Can you use Git without ever using GitHub?

Answers: 1) Git 2) A commit 3) Yes, GitHub is optional

CHALLENGE

Add one sentence to your README explaining Git vs GitHub to a friend who has never coded. Commit it!

LEVEL 2: git init and your first commit

Unlocks tomorrow. You will make your first commit from the terminal.

LOCKED
